

Evaluation of leasehold developers

After a longstanding interest on the part of its residents in urban renewal, the Swiss town of Birsfelden has initiated a project aimed at developing and revitalizing its town center. To achieve an optimally balanced revitalization, the municipality decided to transfer the development of the available properties to a variety of lessees. Working on behalf of the municipality, we managed the lessee evaluation and selection process from start to finish.

Our services

- Conceptualization, organization, execution, and documentation of the entire evaluation process
- Drafting of all tendering and application documents
- Supporting the call to tender and provision of responses to applicant questions
- Drafting of the evaluation criteria
- Review and evaluation of the submitted applications
- Organization and execution of the applicants' presentations and examinations
- Securing of substantive and processual interfaces to the existing district-development plan
